

BC-40 40-Ton Barge Connector Winch

Description:

The time savings and speed in making up tows with winches instead of ratchets is useless if you have to maintain or repair it with every use. The Model BC-40 Barge Connector has been designed to use, not maintain. The winch features high capacity grease free synthetic bearing and a simple counterweight type ratchet without springs to minimize routine maintenance in the abusive waterways environment. The operation of the winch for both tightening and releasing the loads have been engineered for optimum user ergonomics and safety. From the ideal positioning and engagement of the ratchet lever controlled cable release brake the BC-40 is designed for easy operation.

Drum Capacity		
3/4"	7/8"	1"
90 ft	85 ft	70 ft

Features:

- Low profile compact design saves deck space
- Hand lever operated brake for controlled load release
- Hand wheel with spinner knob for fast take-up
- Ratchet lever for final tensioning
- Machine cut gearing with protective guarding
- High capacity synthetic bearings on drive and drum shafts
- Connector pin and yoke allows 360° rotation
- Unique pivot pin mounting (no D-ring required)
- Front mounted rope guard aligns cable with drum

Specifications:

- Dimensions and Weight:
 - Overall Length - 25 1/2"
 - Overall Width - 17"
 - Overall Height - 21 1/2"
 - Overall Weight with Deck Pivot Pin - 443 lbs
- Ultimate Capacity - 80,000 lbs
- Ratchet Tightening Capacity - 10,000 lbs

Due to our policy of continuing development, all specifications are subject to change without notice. Users of these products are responsible for ensuring their suitability for the application in which they are being used.
